

## Mouse Anti Human CD4 PE

### PRODUCT INFORMATION

**CLONE:** HIT4a  
**ISOTYPE:** Mouse IgG2b,  $\kappa$   
**WS.No.:** V 5T CD04.08, 6T-001  
**CATALOG#:** A6083/A6093  
**CONTENTS:** R-PE conjugated antibody in 10mM PBS (pH 7.0) with 0.05%  $\text{NaN}_3$  and 1% BSA.

### DESCRIPTION

CD4 McAb recognizes a 55 KD type I single-chain transmembrane glycoprotein. CD4 antigen is a coreceptor for HLA class II molecule and HIV (human immunodeficiency virus-AIDS virus), which is present on 35%-50% (about two-thirds of peripheral T cells) of peripheral blood lymphocytes-T helper/inducer(Th/Ti), 70%-80% of thymocytes and in low density on the peripheral blood monocytes and tissue macrophages. Th/Ti plays a role in helping Ig production by B lymphocytes and in enhancing the maturation and in increasing effectiveness of cytotoxic CD8 T cells.

### PREPARATION

The monoclonal antibody is purified from ascites by protein G affinity chromatography and is conjugated with R-PE under optimum conditions.

### USAGE

The R-PE conjugation is tested for flow cytometric analysis using  $20\mu\text{l}/10^6$  cells or  $100\mu\text{l}$  peripheral blood cells.

### STORAGE

Store at  $4^\circ\text{C}$ , should not be frozen and avoid prolonged exposure to light.
